

This guided tour is a collection of stories about Sanpete Valley Utah. Artists, experts and locals share the tales, history and culture of the region. The project is designed to be experienced in the landscape at specific locations. The entire valley becomes a museum without walls or limits; and a portal to understanding the power of the landscape and those who have left its legacies to us. Use the Popwalk mobile app to access the driving map and videos.

Instructions: The tours can be completed on foot or by car. Download the app to your mobile device and create a login. It will guide you to geographic locations using satellite mapping. When you reach the site, you can watch and listen to the videos on your phone.
